Kris,

I did some digging for you. To start we have no records for that location prior to 2006. I did check Google Earth and the pit is visible in the 1999 aerial photo. The pit appears to be a produced water pit. It is immediately east of the current heater treater (see below). I spoke with Bill (our field foreman) and he indicated that the pit was removed by Nielsen prior to our ownership. The pit was backfilled and a water leg was installed that now dumps to a produced water tank at the on-pad tank battery. The former pit would be located beneath our current access around the heater treater.

Let me know if you need anything else.

Thanks,

Brian

Subject: old pit

Good Day,

I have a question on an old pit in Mccallum.

Pit facility 112680 is related to well 057-06320 (Fed 5-27X).

Do you have any information on the use/closure of this pit?

The pit was noted as being near the wellhead in a 1994 inspection (doc 500144207). there was a form 15 for the pit submitted in 1997 (this was submitted as a response to the '94 inspection from what I can piece together).

Thanks,

Kris Neidel
