INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Remove the partially-buried produced water vessels.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Five soil samples will be collected, one at the deepest point of the excavation and one each from the centers of the walls of the excavation. Three soil samples from nearby non-impacted native soil will be collected for the purpose of establishing background conditions.

Proposed Groundwater Sampling

☒ Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Samples will collected from the middle of the excavated areas that may have been impacted. Three samples from the possible impacted area will be collected. Samples will be analyzed for BTEX.

Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

OPERATOR COMMENT

According to USDA soil survey on the COGCC website, the soil type is classified as none clay loam, (unsure of soil clasification on the project, purpose, & site Information tab).

Kintz 1 and Kintz 2 wells share a common separator, production tanks and production water tanks.

Implementation and other dates posted in the form are subject to change.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
