**Inspected Facilities:**

Facility ID	Type	Status	Status Date	Well Class	API Num	Facility Name	Insp Status
453631	SPILL OR RELEASE	AC	01/19/2018		-	Wet Canyon	EI

**General Comment:**

This is a follow up inspection to document status of spill response for spill #453631 which was discovered on 1/2/2018. Remediation of impacted areas is occurring under approved COGCC Remediation # 10940.

Observations of the Purgatorie River were made downstream of Wet Canyon (see attached photos). No sheen was observed on the Purgatorie River at the time of inspection.

Four oil sheens were observed on Wet Canyon and are shown in the attached photos. Two sheens were observed behind oil booms placed near the mouth of Wet Canyon. Two other sheens were observed just downstream from where the spill entered Wet Canyon. The amount of oil sheen observed in Wet Canyon has decreased dramatically since first inspected on 1/3/2018.

Three Pioneer employees were observed conducting visual inspection of Wet Canyon and replacing oil booms as needed.
