RE: Field Inspection Form No. 680602456 pertaining to Bondad 33-9 #52

Ms. Roy,

This Letter is intended to respond to the corrective action suggested in Field Inspection Form No. 680602456 pertaining to the Bondad 33-9 #52 well (API 05-067-08089, Location ID 385880). This well was recently sold by WPX Energy Production, LLC, to LOGOS Resources II, LLC, and is presently operated by LOGOS Operating, LLC ("LOGOS"), pending approval of submitted Changes of Operator.

A review of the Colorado Oil and Gas Conservation Commission ("COGCC") website reflects the attached Sundry Notice submitted July 20, 2006, and approved by the COGCC September 19, 2006. The sundry states the following:

"The landowner, Jeff Paxton, was consulted on 7/18/06 concerning rehabilitation of the location and he said he did not want any rehab done. Attached to this Sundry is a statement signed by Mr. Paxton."

In reliance upon the approved Sundry discussed above, LOGOS believes that the Bondad 33-9 #52 well site has been reclaimed in compliance with COGCC regulations and respectfully requests reevaluation of Field Inspection Form No. 680602456 in a manner consistent with the attached sundry.

If any further information is necessary, please contact me at 505-947-4974. Thank you.

Sincerely,
LOGOS Operating, LLC

Darren Rowley
Title: Ignacio Production Lead & Stakeholder Engagement

Please see attached letter and 2006 sundry.

COGCC Decision: **Not Approved**

COGCC
Representative:

See supervisor comment.

COGCC
Supervisor:

COGCC database indicates that WPX is the operator of record and is therefore the responsible party. No Form 10 on file for this location/well.

Site has significant erosion control issues, and a variance for stormwater is not possible.

Location does not meet the required burden for a variance. Reclaim the location per the corrective action date. Location remains out of compliance until reclamation is completed.

The Form 4-Sundry notice referred to in the operator comment and in the database is a notification of abandoned location and does not pass final reclamation. A passing final reclamation inspection is required.

2  CA# 114205

Corrective Action:

Reclaim project area. Stormwater erosion needs to be monitored and controlled throughout reclamation until the location achieves long term stabilization.

Date: 05/01/2018

Response: FACTUAL REVIEW REQUEST

Basis for Review: Action requested was already completed prior to the inspection
