**Subject:** State Reportable Release

Good Morning,

We had a State reportable release yesterday evening due to greater than one barrel of water based drilling fluid being released outside of containment at the location noted below. The release occurred due to trapped pressure being temporarily relieved while tripping pipe into the well during workover operations. More information will be provided in a forthcoming COGCC Initial Form 19 Release Report. Please let me know if you have any questions.

Well: CLIFFORD L3-3  
Legal Description: NENW Sec 3 T3N R66 W  
API: 05-123-15286

Thanks,

**Taylor Rowley**
