

Plan of Development

- General:** The existing tank battery on the Golding 4 pad will be expanded and rebuilt in the same location as the current tank battery. The tank battery on the Golding 4 pad will be used to store water produced from the wells on the NR 23-3 and Golding 4 Pads and condensate produced from the wells on the Golding 4 Pad.
- Production:** The 7 existing tanks (4 water/3 condensate) on the Golding 4 tank pad will be replaced with 10 new tanks (6 -500 bbl water/4-300 bbl condensate) in a 44' x 92' containment. One additional ECD will be installed on location adjacent to the existing ECD for a total of two ECDs.
- Pipeline:** Existing 4" water line between the Clough 18 and Golding 4 will be abandoned or removed. A new 4" Flexpipe water line will be buried from the Clough 18 pad to the Golding 4 tank pad following existing rights-of-way.

Legend

- Proposed Production Equipment Area
- Proposed Daylight Line
- Proposed Pad or Pit
- Existing Road
- Existing Production Equipment
- Proposed Limit of Disturbance
- Existing Fence
- Proposed Water Pipeline (1-4")
- Existing Gas Pipeline
- Existing Water Pipeline
- Existing Road
- Existing Pad
- Parcel Ownership
