COMMENTS

There are no qualifying available water sources within the same quarter section of the permitted production wells (NENE QTRQTR, Section 5, Township 3N, Range 68W). Two water sources were identified as being within a quarter section within a 0.5-mile radius of the proposed production well. However, after contacting the water source owners to determine their operational status, it was determined both water sources were not able to be sampled. On 10/17/2017, per a conversation with the water source owner, the water well (receipt #9058636) was determined to be inoperable because the pump has been removed, therefore, no pumping mechanism is installed. On 11/1/2017, per a conversation with the well source owner, the water well (receipt #0053997P) was disqualified because the well is used for geothermal heating and is a closed loop system without sampling access. Captiva Energy Partner request an exemption for sampling requirements per COGCC Rule 318A.f.(2)C.iv.
