Erin & Justin,

I have reviewed the referenced Form 2A Oil & Gas Location Assessment and have the following comment.

In the Soil section Mallard has correctly listed the 44-Olney fine sandy loam, 0-6 percent slopes NRCS Soil Map Unit. However, the NRCS Soil Map Unit Description that was attached to this Form 2A was for the 45-Olney fine sandy loam, 6-9 percent slopes. Please send me the NRCS Map Unit Description for the 44-Olney fine sandy loam and I will swap it out on the Form 2A.

Please respond to this correspondence by March 8, 2017. If you have any questions, please contact me. Thank you.

Doug –

Here is the requested NRCS Map Unit Description.

Thank you

Justin Garrett
