

**FRYE 29-H PAD
HYDROLOGY MAP**

The map displays a hydrological study area. A prominent feature is a canal labeled "CANAL" in large black letters, which runs diagonally across the upper portion of the map. A dashed cyan line follows the course of this canal. Several water bodies are depicted with blue hatching, including a large one in the upper left and another in the lower right. A network of brown contour lines indicates the terrain's elevation. A series of numbered points (1 through 17) are marked along the canal and in the surrounding areas. A specific area is highlighted with a blue outline, containing a series of orange dots numbered 1 through 13, which likely represent a sampling or monitoring transect. In the lower left corner, there is a north arrow pointing upwards and a scale bar indicating distances of 0, 250, and 500 feet. Below the scale bar, the text "SCALE: 1\"= 500'" is provided. The map also shows some infrastructure, such as a road labeled "4951" and various small black squares representing buildings or structures.
