Response: CA COMPLETED

Date of Completion: 08/10/2016

Operator Comment: Storm Water BMPs were adjusted and implemented as per inspector comments. Areas around pad were regraded to accomodate greater levels of vegetative growth. Seeding was implemented to increase levels of vegetative cover on slope areas. Sustaining growth of vegetation on the shale/scree slopes will be problematic. We will review the conditions at this location on a yearly basis and discuss activities with the COGCC in an effort

to accomodate concerns detailed in the inspection.

COGCC Decision: Approved pending re-inspection
