**General Comment:**

Site inspection conducted on February 09, 2018. Sunny and warm for this time of the year (about 55 oF). Site has four producing wells, two 300-bbl tanks for produced water and condensate storage and two separators. All equipment are properly fenced and labeled. The tanks are lined and have a steel wall secondary containment. No junk, staining, or trash was observed on site. The former pit (Closed) back filed and reconterted shows no sign of subsidence.
