**Best Management Practices**

<b><u>No</u></b>		<b><u>BMP/COA Type</u></b>	<b><u>Description</u></b>
1	Drilling/Completion Operations		To meet the Rule 317.p open-hole logging requirements on the GR 23-11V multi well pad, TEP will use logs from the existing Federal GR 23-11V well (API # 05-045-06811). All wells on the pad will have a cement bond log (CBL) with gamma-ray run on production casing (or on intermediate casing if production liner is run) into the surface casing. The Form 5, Completion Report, for each well on the pad will list all logs run and have those logs attached. The Form 5 for a well without open-hole logs will state "No open-hole logs were run" and will clearly identify the type of log and the well (by API#) in which open-hole logs were run.

Distance from completed portion of wellbore to the nearest lease line is 83 ft.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.

Engineer	Offset water well check: COGCC evaluated offset water wells within one mile of this proposed well's surface hole location. This information was used in addition to locally-available geophysical logs and hydrogeologic information to evaluate the adequacy of the operator's proposed surface casing setting depth. The deepest water well within one mile is 60 feet.	02/14/2018
