Location ID: 446515

**Photo 1:** Photo of sign at well.

**Photo 2:** Photo taken from the north end of the location, facing west. Photo shows areas no longer reasonably needed for production appear to have been reduced. Topsoil appears to have been replaced. Areas appear to have been ripped for compaction alleviation. However, 1003.c requires operator to cross-rip; location appears to have only been ripped once, in one direction rather than cross-ripping. Areas within rangeland do not appear to have had revegetation activities conducted in 2017. Rig release date 8/20/2016. Interim reclamation and revegetation activities in accordance to 1003 should have been conducted by 3/20/2017.
