**General Comment:**

This is a follow-up inspection to Field Inspection Report (FIR) Document #682403208 and in response to Field Inspection Report Resolution Document #401534614 stating that corrective actions have been performed. Where corrective actions from the previous inspection report remain unresolved, corrective action dates remain unchanged.

1002c. PROTECTION OF SOILS \_\_\_\_\_

Comment

Copied from the previous FIR:

Topsoil has been temporarily stabilized with hydromulch for short-term stabilization. Operator shall consider long-term stabilization BMPs when stabilizing all stockpiles to ensure compliance under Rule 1002.c.

Per Rule 1002, all stockpiles shall be protected from degradation due to contamination, compaction and, to the extent practicable, from wind and water erosion during drilling and production operations. Per Rule 1002, BMPs to prevent weed establishment and to maintain soil microbial activity shall be implemented.

| <p>Comment: Operator IN-PROCESS of performing the corrective actions; therefore, the corrective actions are still open until resolved. Operator plans to stabilize the outer perimeter disturbance with hydromulch to prevent wind erosion and re-install straw wattles along a portion of the southeastern location. Operator has performed some of the corrective action work by re-tracking side slopes and applying more hydromulch. Operator claimed to install sediment traps along the western location but these would not be considered sediment traps because there is no stabilized outlet. Operator claims that weather conditions were the reason for not completing the corrective actions by the due date. Refer to the attached inspection photos for more detail.</p> <p>Corrective Action: <span style="color: red;">Install or repair required BMPs per Rule 1002.f.</span> Date: 02/01/2018</p> |                 |  |                       |  |                          |         |

| <b>COGCC Comments</b>  |           |            |
|--|-----------|------------|
| Comment  | User      | Date       |
| A follow-up inspection will occur at a future date to ensure compliance with Rule 1002.f. standards. Pipeline installation is in-process and appears to have compromised portions of the perimeter straw wattle BMPs. Operator shall work with the Pipeline company to ensure stormwater BMPs are maintained at all times. | binschusc | 02/14/2018 |
| One corrective action remains open from the previous FIR, not two.   | binschusc | 02/14/2018 |
