General Comment:

This is a follow-up inspection to Field Inspection Report (FIR) Document #682403215 and in response to Field Inspection Report Resolution Document #401534302 stating that corrective actions have been performed. Where corrective actions from the previous inspection report remain unresolved, corrective action dates remain unchanged.

1003 f. Weeds Noxious weeds? _____

Comment Copied from the previous inspection: This location is not in compliance with Rule 1003 standards. Operator has unmanaged Russian thistle (*Salsola tragus*-tumbleweed) throughout the perimeter and interim areas, which is considered, weed debris. Interim reclamation areas are not reflective of reference area vegetative levels. Reference area species include, but not limited to, Prairie sandreed (*Calamovilfa longifolia*), sand dropseed (*Sporobolus cryptandrus*) and blue grama (*Bouteloua gracilis*). Current interim vegetation consist mostly of Russian thistle.

Corrective Action Perform reclamation in accordance to Rule 1003. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until the location meets Rule 1003 standards. Interim reclamation activities shall be completed by April 30, 2018.
