OPERATOR COMMENTS AND SUBMITTAL

Comments

The distance to the nearest well was measured shortest productive interval between the Surprise Unit 3-09H and the Surprise Unit 6-09H which are being permitting concurrently. There are multiple leases that cover this location. The horizontal wellbore crosses the listed lease line and conforms to all unit setbacks. The well is in the North Park Horizontal Niobrara Field, Code 60120. The COGCC system will not accept the name stating, "Field name must be less than or equal to 20 characters." We request the COGCC change this internally. We have requested this issue be fixed previously. We cannot submit correctly until this issue is resolved. The well was submitted under a Wildcat field.

There are no changes from the original APD filing.

Please contact Angela Callaway at 303-942-0506, or at acallaway@upstreampm.com for questions regarding this permit.

<u>No</u>	<u>BMP/COA Type</u>	<u>Description</u>
1	Drilling/Completion Operations	One of the first wells drilled on the pad will be logged with open-hole Resistivity Log and Gamma Ray Log from the kick-off point into the surface casing. All wells on the pad will have a cement bond log with gamma-ray run on production casing (or on intermediate casing if production liner is run) into the surface casing. The horizontal portion of every well will be logged with a Cement Bond Log with cased-hole gamma ray log from TD into the surface casing. The Form 5, Completion Report, for each well on the pad will list all logs run and have those logs attached. The Form 5 for a well without open-hole logs shall clearly state "No open-hole logs were run" and shall clearly identify (by API#, well name & number) the well in which open-hole logs were run.
