Site Investigation and Remediation Workplan (Initial Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Refer to Rules 340, 905, 906, 907, 908, 909, and 910

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Produced water vaults were removed by Unlimited.

REMEDICATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Any remediation action, if any, is dependent on pit soil sample analysis results from the lab. If lab results show no impacts, the pits will be backfilled. If lab results show any impact, it will trigger an assessment of impact extent for the respective pit.

OPERATOR COMMENT

This Initial Form 27 is for the removal and site investigation of two partially buried produced water vaults at the tank battery location. The vaults have already been removed, but the two pits left behind have yet to have soil samples collected. Soil sampling and analysis is the next step towards the reclamation and closure of the partially buried produced water vaults.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
