Cc: Sydney Smith <:ssmith@fifthcreekenergy.com>

Hi Doug,

I wanted to introduce myself as I am handling all regulatory responsibilities on behalf of Fifth Creek Energy while Sydney Smith is out on leave. That being said, attached is the NRCS Soil Unit Description to be added to the referenced Form 2A. Also, please make the appropriate changes to the below:

1) In the Water Resources section Fifth Creek Energy has indicated the nearest downgradient surface water feature is 549 feet away. A review of the Hydrology Map indicates Little Crow Creek is 61 feet from the edge of the proposed disturbance area. Therefore, I would like to change the distance to the nearest downgradient surface water feature from 549 feet to 61 feet.- *Yes, please change the distance to 61 feet.*

2) In the Water Resources section Fifth Creek Energy has indicated this proposed Oil & Gas Location is within a mapped floodplain. Based on this, I would like to change the Water Resources section to indicate YES, this is a sensitive area.- *Yes, please mark YES for being in a sensitive area.*

If you have any questions or require additional information, I can be reached at the contact information below!

Regards,

Meghan Twele
