**Reclamation - Storm Water - Pit**

**Storm Water:**

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment
Check Dams	Fail	Gravel	Pass			
Gravel	Fail					
Rip Rap	Fail					
Ditches	Fail					
Berms	Pass	Compaction	Pass	Self Inspection	Fail	
Compaction	Fail					

Comment: It appear corrective actions from previous inspection have been performed but additional maintenance is required. The SW, W, and NW location fill slope has rilling, erosion channels, and gully erosions. The erosion channels are 4"-18" wide and 4"-20" deep carrying stormwater and sediment off location. The fill slope remains fairly unstable creating erosion issues. Ditches, check dams, and rip rap have failed filling with sediment allowing them to be breeched and over run. The corrective action time is extended to allow for winter weather working conditions but repairs should be made as soon as possible to prevent further erosion damage.

Corrective Action: Install or repair required BMPs to comply with Rule 1002.f.

Date: 04/26/2018

**Pits:**  NO SURFACE INDICATION OF PIT
