CORRECTIVE ACTIIONS:

1 CA# 114405

Corrective Action: Comply with Rule 603.f. Date: 03/15/2018

Response: CA COMPLETED Date of Completion: 03/08/2018

Operator Comment: The first two unused riser/flowlines (photos 2 and 3 in Form INSP) are a steel supply gas line from the separator to the wellhead (on-location). The wellhead riser has been repaired, and the upstream riser is isolated from the pressure source by lock-out tag-out. The third unused riser (photo 4) has been removed. The fourth riser (photo 5) is located downstream of a domestic tap. We are working with the landowner on several changes to their tap

gas system. In connection therewith, the fourth riser will be removed as soon as weather conditions allow for temporary tap gas shut-in and safe locating and excavating, anticipated no later than April 30. In the meanwhile the valve on the riser is locked out and tagged out.

COGCC Decision: \_\_\_\_\_
