Steve,

Sorry for the delay on this; I spoke with Mark Short, LO, and they had a fertilizer spill.

Let me know if you need anything additional from me.

Thanks,

MILES VENZARA

Miles,

I spoke with the COGCC and they have asked that we identify what activities the landowner was doing to create this discharge. Can you do this?

Steve,

Craig called this afternoon with a potential release at the Clovis B2. COGCC Inspector Roy was on the location and saw what she believed to be oil leaking from the edge of the location. Craig responded to the location and met with inspectors Roy and Hughes. There is no release from BP equipment and it appears that a landowner may have washed a piece of agricultural equipment on or near our well pad. Please speak with Craig but it looks like we may need to follow up with some confirmation sampling.

Craig took four photos while on the location and I have placed them in the following file:
I:\EH&S\Environmental\Spills\2018 Non-agency reportable\Clovis B2

Thanks,

Andy
