Re: Request for Exception to Rule 317.p

1. **DC-22**, Doc # 401565645, Sec. 8, T40N, R17W, LAT: 37.737199 / LONG: -108.751609

Dear Director Murphy,

Kinder Morgan CO2 Company, L.P. respectfully requests approval for an exception to COGCC Rule 317.p and run a Cased Hole Pulse Neutron Log for the DC-22 well bore location listed above. Rule 317.p of the Colorado Oil and Gas Commission Rules and Regulations requires wells to be logged with a minimum of a resistivity log with gamma ray. The above named well is requested to be exempt from this requirement due to problems with exploration through the Gothic Shale formation.

The well listed above will also be cased-hole logged with a cement bond and gamma ray log from the TD point to the surface. The Drilling Completion Report (Form 5) submitted for each well will indicate that "no open-hole logs were run" for the intermediate cased-hole interval to surface; below that point the Leadville zone is open-hole logged and logs submitted.

Thank you for your consideration of this matter, if you have any questions or need additional information, please do not hesitate to contact me at (970) 882-5537.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Chris S. Lopez".

Chris S. Lopez
