This Form 2 refile is being submitted to maintain the existing, open conductor pipe set for this well and future development plans. Conductor information provided on the Casing tab is actual, as-drilled information. The Dever A pad is an existing pad with 9 producing wells. There is no additional surface disturbance associated with this refile, therefore a refiled / amended Form 2A is not required at this time. No changes to the well location (SHL or BHL) or wellbore construction are proposed with this refile. There have been no changes in land use, mineral lease information or surface use agreement. Top of cement of 1st string/production casing will be >500 feet above top of gas.

Distance to nearest well measured to the Dever A6 (Ursa, PR, 045-12158). Distance to the nearest non-operated well completed in the same formation measured to the Encana Fee 19-5A (Caerus, PR, 045-20776).

Please refer to previously approved APDs for other required attachments. The following attachment have been updated accommodate current COGCC standards and are included with this refile:

- Well location plan
- Cultural distances table
- Directional plan
- Directional data
