Dear Sirs. Yours of 6th at hand
I have Leased to The Emau Oil Corporation
3-40 acres Tracts out of the South East 1/4 of
Sec 28 Tpw 3 S. Range 64. They have their
water well. Now I started the oil hole on
well no 1. Buying a Standard Rig to Commence
well no 2 as soon as they can get it on
ground. They have promised to keep a
complete log of well also keep a sample
of all changes in ground as they go down
They seem to be very confident of oil &
claim to have had some Gas & oil in the
water hole at about 275 feet

Yours Truly

A O McMichael
