General Comment:

Environmental**Spills/Releases:**

Type of Spill: PRODUCED WATER

Estimated Spill Volume: _____

Comment: Follow up to annual report of REM#5248 issued to Chevron (former operator) for pit closure. Well is now operated by Foundation. Quarterly EFR extraction of LNAPL, PW and vapor has continued. Measurable free product continues to recover in one well. Multiple monitoring/extraction wells remain on locations. Exterior appearance indicates well are being maintained.

Corrective Action: Continue approved or enhanced REM remedial actions until all free product is removed, then commence groundwater monitoring. Dissolved petroleum concentrations in groundwater must remain Table 910-1 compliant for a minimum of one year prior to final closure. This inspection was for environmental purposes only. It does not address other potential corrective actions.
