DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
Yes	SOILS	Minimal/Moderate	Soil was visually inspected. This spill is on an active well pad.

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Operator isolated and depressured all related equipment and reported the spill. A one-call was initiated to get all lines marked for excavation. A liner was brought to location to hold contaminated soil that was excavated.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

In order to verify that all contaminated soil has been removed; four soil samples will be obtained and tested for GRO/DRO prior to obtaining a Table 910-1 analysis. Location of samples are shown on the attached photos. One at the bottom of the trench under the old pipe where leak occurred, one on each side wall under the coal seam, and one at the far end of the trench.

Proposed Groundwater Sampling

☐ Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Wexpro will obtain soil samples to be analyzed confirming all contaminated soil was removed.

REMEDIAL ACTION PLAN

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Contaminated soil was removed and placed on a liner. Contaminated soil will be hauled by truck to the R-360 Disposal site in LaBarge, WY on Monday, April 2, 2018.

REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Wexpro will complete initial soil analysis to determine if contamination has been completely removed. If analysis determines no additional contamination a soil analysis will be conducted testing for Table 910-1 requirements. Upon passing of final analysis results the open trench will be backfilled.

OPERATOR COMMENT

On March 26, 2018 the damaged pipe was cut off and removed from service. The remaining pipe for both the water dump line and oil dump line were pressure tested with gas from the wellhead to 180 psi and both held and confirmed there was no further damage or spill potential. New pipe will be attached to the existing pipe and put back into service. Once soil analysis confirms no further contamination new soil will be hauled in to backfill the excavated area. Cubic yards of contaminated soil will be reported once determined by trucking and disposal.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
