Rick,

Per our discussion this afternoon, I spoke with our operations folks again and confirmed that we received a call from the Nunn FD on Friday 3/23 about a possible release. We then shut in the flowline and spoke with the landowner on 3/23. I'm assuming the Nunn FD was notified of the release by the landowner. I'm not sure if the landowner misremembered the date or if he called again on Saturday, 3/24. We will get the supplemental with figure submitted today.

Thanks,

Ben

Ben

COGCC is reviewing the Form 19 Initial Spill/Release Report for the Pierce Unit 2 flowline release. There is some discrepancy about when the release occurred or was discovered and when the landowner was notified. The landowner said he found the release on 3/24/2018 and notified Great Western. Great Western has stated on the Form 19 and in a previous email to me that the release occurred on 3/23/2018 and the landowner was notified on that day by Great Western. Please clarify the timing of events including who notified who and when.

Also, note that a Supplemental Form 19 including the spill/release detail report and topographic map or aerial image was due either today, April 2, or tomorrow April 3, depending on the actual release date.

Thank you

Rick
