| <u>Comment:</u> | The existing flowline has been marked (pin flagged) and runs North in direction; this flowline has failed a pressure test and is scheduled to be re-routed/ replaced. KP Kauffman is in process of installing a new off location flowline from the wellhead, routed south in direction. Approximately 150 linear feet of flowline trench has been excavated; however, it is unclear where the endpoint (tie in) of this flowline is to be located. | |
