Colorado Oil and Gas Conservation Commission (COGCC) Rule 317.s provides:

**s. Statewide Fracture Stimulation Setback.**

(1) No portion of a proposed wellbore's treated interval shall be located within 150 feet of an existing (producing, shut-in, or temporarily abandoned) or permitted oil and gas wellbore's treated interval belonging to another operator without the signed written consent/waiver of the operator of the encroached upon wellbore. The signed written consent/waiver shall be attached to the Application for Permit-to-Drill, Form 2 for the proposed wellbore.

(2) The distance between wellbores measurement shall be based upon the directional survey for drilled wellbores and the deviated drilling plan for permitted wellbores, or as otherwise reflected in the COGCC well records. The distance shall be measured from the perforation or mechanical isolation device.

Please evidence Kerr McGee's written consent/waiver below and return this letter to [laurie.wizeman@Crestonepr.com](mailto:laurie.wizeman@Crestonepr.com) at your earliest convenience. Thank you and please contact me with any questions.
