### DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
UNDETERMINED	SOILS	6" below tank & 4.5' east of tank	Field observation & screening

### INITIAL ACTION SUMMARY

Description of initial action or emergency response measures taken to abate, investigate, and/or remediate impacts associated with E&P Waste.

The contractor excavated and removed the partially buried, fiberglass produced water tank from the site. No visual impacts were observed and no elevated photoionization detector (PID) readings were measured in discrete soil samples collected from the north, west, and south walls of the excavation. The discrete confirmation soil sample collected from the center of the excavation, directly beneath the tank, at 48 inches below ground surface (bgs), exhibited a PID reading of 743 parts per million (ppm). The discrete soil sample collected from the east wall of the excavation at 40 inches bgs, exhibited a PID reading of 564 ppm. Based on field observations and PID results, the contractor excavated an additional 12 inches beneath the tank and an additional 5 feet to the east of the east wall of the excavation. No visual impacts were observed and no elevated PID readings were measured in two additional discrete soil samples collected from 60 inches bgs beneath the tank, and from 40 inches bgs, 5 feet east of the east wall of the excavation.

### PROPOSED SAMPLING PLAN

#### Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Five discrete confirmation soil samples were collected (4 wall and 1 base) and analyzed for benzene, toluene, ethylbenzene, total xylenes (BTEX), gasoline range organics (GRO), and diesel range organics (DRO). Concentrations of BTEX, GRO, and DRO were not detected at or above laboratory reporting limits. See the attached laboratory report, soil analytical table, and Figure 3.

#### Proposed Groundwater Sampling

☐ Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

#### Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

#### Additional Investigative Actions

☐ Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

### **SOURCE REMOVAL SUMMARY**

Describe how source is to be removed.

Operator excavated approximately 5.7 cubic yards of soil, from beneath and to the east of the tank, that exhibited visual impacts and elevated PID readings for offsite disposal.

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Successful remediation and confirmation soil sampling activities were conducted on 4/2/18 and are detailed in the Initial Action Summary on the Site Investigation Plan tab of this Form.
