Gravel removed _____

Location and associated production facilities reclaimed _____ Locations, facilities, roads, recontoured _____

Compaction alleviation _____ Dust and erosion control _____

Non cropland: Revegetated 80% _____ Cropland: perennial forage _____

Weeds present _____ Subsidence _____

1004.d. FINAL VEGETATION TRANSECT
 TRANSECT RESULTS OF DISTURBED AREA% _____
 TRANSECT RESULTS OF REFERENCE AREA% _____
 TOTAL % OF DESIRABLE VEGETATION COVER _____
 VEGETATIVE COVER _____

Comment:

Previous inspections documented that crop vegetation growth over access road is stunted when compared to the adjacent areas, and that this is likely due to compaction concerns. The inspection required operator to perform additional reclamation. Operator submitted notice to inspector (via email and FIRR #401494606) that additional work has been conducted and corrective action addressed. Crop field currently fallow; it is unclear as to what additional reclamation activities have been conducted. A follow-up inspection will need to be conducted once crop has become established to determine compliance with reclamation standards and requirements

Corrective Action:
