#### **COA Type**

#### **Description**

	Operator will insure the wellbore beyond the unit boundary setback is physically isolated and is not completed. In the Operator Comments on the Form 5A the operator will (1) report the footages from the section lines of the bottom of the completed interval (2) describe how the wellbore beyond the unit boundary setback is physically isolated and (3) certify that none of the wellbore beyond the setback was completed.
	Bradenhead tests shall be performed and reported according to the following schedule and Form 17 submitted within 10 days of each test: 1) Within 60 days of rig release and prior to stimulation or 2) If a delayed completion, 6-7 months after rig release and prior to stimulation. 3) Within 30 days after first production, as reported on Form 5A.
	1) Submit Form 42 electronically to COGCC 48 hours prior to MIRU (Spud Notice), for the first well/activity on the pad and provide 48 hour spud notice for all subsequent wells drilled on the pad. 2) Comply with Rule 317.j and provide cement coverage from the end of production casing to a minimum of 200' above Niobrara. Verify coverage with cement bond log.

#### **Description**

1	Drilling/Completion Operations	BBC will adhere to the COGCC Policy for Bradenhead Monitoring effective 5/29/12.
2	Drilling/Completion Operations	One of the first wells drilled on the pad will be logged with open-hole Resistivity Log and Gamma Ray Log from the kick-off point into the surface casing. All wells on the pad will have a cement bond log with gamma-ray run on production casing (or on intermediate casing if production liner is run) into the surface casing. The horizontal portion of every well will be logged with a measured-while-drilling gamma-ray log. The Form 5, Completion Report, for each well on the pad will list all logs run and have those logs attached. The Form 5 for a well without open-hole logs shall clearly state "No open-hole logs were run" and shall clearly identify (by API#, well name & number) the well in which open-hole logs were run.

Permit	Corrected operator comment: removed "spacing" as this is a federal exploratory unit.	04/19/2018
Permit	Open Hole Logging BMP submitted by operator. With operators concurrence added setback comment. Corrected the spacing order and added Federal unit name and number. Permitting Review Complete.  Surface Restoration Bond on file with SLB. Final Review Completed.	03/27/2018
Engineer	Offset Wells Evaluated	03/26/2018
Permit	Passed Completeness.	03/23/2018
Permit	Returned to draft for: - attachment Directional Data is for a different well - proposed depth on the 'Casing" tab does not match the proposed depth on the "Drilling & Waste Plans" tab	03/20/2018
Permit	Returned to draft for: - attachment "EXCEPTION LOC REQUEST" is actually an "EXCEPTION LOC WAIVER" - missing attachment "EXCEPTION LOC WAIVER" - "Surface & Minerals" tab: the box for surface owner "is committed to an oil and gas lease." and "has signed an Oil and Gas Lease." is checked. If these are checked, then the box above indicating the surface owner as mineral owner, also needs to be checked. If that is not the case, then these should be unchecked	03/16/2018
