# REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No \_\_\_\_\_

## SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

An initial excavation to remove source material occurred on December 11, 2017. Further excavation of impacted source material was conducted and an additional 4000 cubic yards of soil was removed and treated ex situ with a soil shredder and hydrogen peroxide.

## REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Remediation of impacted soil will be completed using a soil shredder with hydrogen peroxide application. Treated soil will be sampled every 100 cubic yards and will be analyzed for TPH-DRO, TPH-GRO, BTEX, and Naphthalene. Confirmation soil samples will be collected from the sidewalls and base of the excavation.
