232482	WELL	PR	03/01/2017	OW	107-05048	RICHFIELD-WIRICK-FEDERAL 1	EI

General Comment:

On 4/23/2018 COGCC Environmental Staff, Kris Neidel inspected the Richfield-Wirick-Federal #1. Weather was sunny and 55 deg, ground was damp from rain and snowmelt. This inspection is a follow up to an Inspection dated 3/30/2018. It is Magpies responsibility to assure that corrective actions from previous inspection have been addressed. COGCC staff witnessed pooling of water at the wellhead. Surface water flow is directed around the well, surface water is ~20' from wellhead. The Tank Battery secondary containment volume that was mentioned in previous inspection should be evaluated. It is not obvious due to vegetation if the tanks have adequate secondary containment, this should be addressed immediately. By 3/23/2018, an eForm 19, Spill/Release report should be filed with COGCC documenting spill that was discovered on 3/30/2018 and address fluid that was observed around the well on 4/23/2018. Photos are attached. Bubbles were observed coming from the outside of the casing, Contact COGCC Engineering Supervisor, Craig Burger at 970-625-2497 regarding integrity issues.
