Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27.

This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Refer to Rules 340, 905, 906, 907, 908, 909, and 910

## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Foundation conducted pit assessment activities at the Federal 3-11 site, pit ID 115193, in December 2016. Investigative and remediation activities were described in the Supplemental Form 27 documents Submitted August 3, 2017 (document 401361618 and resubmittal document 401548951) and October 23, 2017 (document 401436717).

## PROPOSED SAMPLING PLAN

### Proposed Soil Sampling

Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Soil sampling activities were described in the Supplemental Form 27 documents Submitted August 3, 2017 (document 401361618 and resubmittal document 401548951) and October 23, 2017 (document 401436717).

### Proposed Groundwater Sampling

Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

Initial groundwater samples were collected from the excavation on July 19, 2017 and July 21, 2017 and submitted for analysis of benzene, toluene, ethylbenzene, and total xylenes (BTEX). Initial groundwater sampling during remediation activities was described in the Supplemental Form 27 documents Submitted August 3, 2017 (document 401361618 and resubmittal document 401548951) and October 23, 2017 (document 401436717) and the sample results are included in Table 1.

Temporary groundwater monitoring well locations were proposed in the October 23, 2017 Supplemental Form 27 and approved by COGCC on October 24, 2017. Five temporary monitoring wells (BH01-BH05) were installed at the site between 12/5/2017 and 12/6/2017 to further assess the extent of groundwater impacts. Quarterly groundwater sampling was initiated on 12/13/2017, and is ongoing.

### Proposed Surface Water Sampling

Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

The arroyo located southeast of the former pit location was dry during initial assessment activities in December 2017. As such, no samples were collected from this apparently intermittent surface water feature.

## Additional Investigative Actions

Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

## OTHER INVESTIGATION INFORMATION

Were impacts to adjacent property or offsite impacts identified?

Were background samples collected as part of this site investigation?

Background soil sampling activities were described in the Supplemental Form 27 documents Submitted August 3, 2017 (document 401361618 and resubmittal document 401548951) and October 23, 2017 (document 401436717).

Was investigation derived waste (IDW) generated as part of this investigation?

Volume of solid waste (cubic yards) \_\_\_\_\_ Volume of liquid waste (barrels) \_\_\_\_\_

Is further site investigation required?

Fourth quarter 2017 groundwater sampling results indicate that hydrocarbon impacted groundwater remains at the site. Additional temporary monitoring wells may be installed in the future, if necessary, to maintain POC. The temporary groundwater monitoring well network will be sampled on a quarterly basis and submitted for laboratory analysis of BTEX until concentrations remain below COGCC groundwater standards for four consecutive quarters.

# REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? Yes \_\_\_\_\_

## SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Impacted soil was remediated as described in the Supplemental Form 27 documents Submitted August 3, 2017 (document 401361618 and resubmittal document 401548951) and October 23, 2017 (document 401436717).

## REMEDICATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Remediation activities were described in the Supplemental Form 27 documents Submitted August 3, 2017 (document 401361618 and resubmittal document 401548951) and October 23, 2017 (document 401436717).

Quarterly groundwater monitoring is ongoing and will be continued until concentrations remain in full compliance with State standards for four consecutive quarters. Estimated time to attain No Further Action (NFA) is to be determined (TBD) based on the review of groundwater concentrations, the extent of impacted groundwater, and the efficacy of selected remedial technologies.

## GROUNDWATER MONITORING

If groundwater has been impacted, describe proposed monitoring plan, including # of wells or sample points, monitoring schedule, analytical methods, points of compliance. Attach a groundwater monitoring location diagram.

Between December 5, 2017, and December 6, 2017, a total of 5 temporary monitoring wells were installed at the site to assess the extent of groundwater impacts. The temporary monitoring wells will continue to be sampled on a quarterly basis and submitted for laboratory analysis of BTEX until concentrations remain in full compliance with State standards for four consecutive quarters. Step-out temporary monitoring wells will be installed to gain point of compliance (POC); additional temporary monitoring wells may be installed in the future, if necessary, to maintain POC. A potentiometric surface contour map for the Fourth Quarter 2017 is presented as Figure 2 and Groundwater sample results are illustrated on Figure 3. Well completion logs for the temporary monitoring at the site are included as Attachment A.

## REMEDATION COMPLETION REPORT

### REMEDATION COMPLETION SUMMARY

Is this a Final Closure Request for this Remediation Project? No

Do all soils meet Table 910-1 standards? \_\_\_\_\_

Does the previous reply indicate consideration of background concentrations? \_\_\_\_\_

Are the only residual soil impacts pH, SAR, or EC at depths greater than 3 feet below ground surface? \_\_\_\_\_

Does Groundwater meet Table 910-1 standards? \_\_\_\_\_

Is additional groundwater monitoring to be conducted? \_\_\_\_\_

## RECLAMATION PLAN

### RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

The former pit excavation area was backfilled to approximately 3' bgs. Future post-remediation reclamation activities at the site will be compliant with applicable COGCC and BLM regulations.

Is the described reclamation complete? Yes

Does the reclamation described herein constitute interim or final reclamation of the Oil and Gas Location?

Interim?  Final?

Did the Surface Owner approve the seed mix? \_\_\_\_\_

If NO, does the seed mix comply with local soil conservation district recommendations? \_\_\_\_\_
