Description

Operator Comments:

Per the permit COA requirements for the Azul 13-13HZ pad, Kerr-McGee is required to perform offset mitigation option 1 or 2 for the ELLIOTT-CRONIN 1 (05-123-08008) well due to its proximity to the offset completions that will take place on the Azul 13-13 pad wells. Per correspondence with COGCC Engineer Diane McCoy on April 17th, 2018, Kerr-McGee requests the option to mitigate the well using option 4 as outlined in the Interim Statewide Horizontal Offset Policy dated February 10, 2014. As discussed with COGCC, Kerr-McGee would like to keep the surface casing open and monitor during completions as opposed to the requirement to add additional cement to the well. Per a CBL run on April 17th, the well depicts adequate cement coverage in the surface casing, which would eliminate the need for an upper squeeze on the well.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
