### CORRECTIVE ACTIONS:

1 ☒ CA# 115114

Corrective Action:

Date: \_\_\_\_\_

Perform final reclamation on the access road and location per COGCC 1004 Rules including but not limited to recontouring, replacement of topsoil, and seeding of site. Install and maintain appropriate BMPs to stabilize location until uniform vegetation establishes across all disturbance areas.

Operator is directed to perform corrective actions outlined on this inspection report immediately. Doing so may decrease the duration of the alleged violations and potential penalties that may be assessed pursuant to Rule 523.

Response: CA COMPLETED

Date of Completion: 05/01/2018

Operator  
Comment:

The well pad and access road were recontoured to match the surrounding terrain. This process allowed for soil decompaction. The topsoil stockpile was used during reclamation activities. Grading techniques were installed on the contour to promote ground infiltration and prepare the soil for seeding. The earth disturbance was stabilized by hydro-seeding with an approved Hill Ranch seed mix to promote the establishment of vegetation. A dirt berm was installed at the toe of reclamation for sediment control on the pad. All piping and debris were removed from location.

COGCC Decision: Approved pending re-inspection
