### OPERATOR COMMENTS AND SUBMITTAL

Comments The distance to the completed portion of the nearest well on the "Spacing & Formations" tab was measured to the proposed Rinn Valley East N17-20-8N in 2D via COGCC GIS Mapping. The distance to the closest well belonging to another operator on the "Drilling & Waste Plans" tab was measured to Crestone Peak's File 32-17. Distances was measured in 3D via the anti-collision report (attached as "other") because when measured in 2D via COGCC GIS Mapping, the File 32-17, File 31-17, and File 4-2-17 wells appear to intersect the proposed wellbore but they are actually 196', 218', and 659' away, respectively.

The surface owner has waived Rules 318A.a. & 318A.c. in the SUA, highlighted on page 6 of the attached SUA.

<u>COA Type</u>	<u>Description</u>

## Best Management Practices

No	<u>BMP/COA Type</u>	<u>Description</u>
1	Noise mitigation	Noise levels will be assessed as necessary and mitigation measures such as, but not limited to, sound walls will be implemented to maintain compliance with Rule 802. and 604.c.(2).A.
2	Drilling/Completion Operations	317.p One of the first wells drilled on the pad will be logged with open-hole Resistivity Log and Gamma Ray Log from the kick-off point into the surface casing. All wells on the pad will have a cement bond log with gamma-ray run on production casing (or on intermediate casing if production liner is run) into the surface casing. The horizontal portion of every well will be logged with a measured-while-drilling gamma-ray log. The Form 5, Completion Report, for each well on the pad will list all logs run and have those logs attached. The Form 5 for a well without open-hole logs shall clearly state "No open-hole logs were run" and shall clearly identify (by API#, well name & number) the well in which open-hole logs were run.
3	Drilling/Completion Operations	Anti-collision: Operator will perform an anti-collision evaluation of all active (producing, shut in, or temporarily abandoned) offset wellbores that have the potential of being within 150 feet of a proposed well prior to drilling operations for the proposed well. Notice shall be given to all offset operators prior to drilling.
4	Drilling/Completion Operations	Operator acknowledges and will comply with COGCC policy for Bradenhead Monitoring during Hydraulic Fracturing treatments in the Greater Wattenberg Area dated May 29, 2012.
