TOTAL % OF DESIRABLE VEGETATION COVER _____

VEGETATIVE COVER _____

Comment: It appears that approximately 2/3 (two thirds) of Location has not been reclaimed but left as turnaround / Camping area; Operator has confirmed this; stating that they had been acquiescing to Surface Owner request. The area that has been reclaimed has robust diverse vegetation. Noxious weeds; B List Houndstongue, White top, and Thistle are present, as well as C List, Cheat grass, Mullein, and nuisance annual weed, Mustard, that becomes debris. Refer to Photo Log attached for detail of site conditions.

Corrective Action:	<p>There are Two Corrective Actions in this section.</p> <p>CA#1) Perform Final Reclamation per COGCC 1004 Rules including entire area of original Location disturbance; all Reclamation Activities to be complete by November 1, 2018.</p> <p>CA#2) Control Noxious Weeds ASAP at least by 6/8/18. Short corrective action window is given because of imminent seed maturity. Operator was contacted day of Inspection & indicated they would be applying controls in the next few days.</p>	Date	11/01/2018
Overall Final Reclamation	Fail	Well Release on Active Location	<input type="checkbox"/>
		Multi-Well Location	<input type="checkbox"/>
