

MV 15-8 Excess Storage Area	Sq/Ft	Acres
Proposed Storage Acreage	51,314'	1.18

**Plan of Development**  
 Excess material generated during construction of the MV 60-8D pad will be hauled by truck to the MV 15-8 pad and temporarily stored within the temporary staging areas show above during drilling and completions operations on the MV 60-8D pad. Some excess material stockpiled at the MV 15-8 pad will remain on location to improve the interim reclaim. The remaining excess material not necessary for reclamation on the MV 15-8 pad will be hauled by truck back to the MV 60-8D during reclamation.

- Legend**
- Excess Stockpile
  - Spring Buffer
  - Spring Drainage
  - Existing Gas Pipeline
  - Existing Water Pipeline
  - Parcel Ownership
  - Existing Road
  - Existing Pad
