Reclamation - Storm Water - Pit**Interim Reclamation:**

Date Interim Reclamation Started: _____ Date Interim Reclamation Completed: _____

Land Use: _____

Comment: Project area is surrounded by sagebrush shrubland and grazed grass field. Revegetation is sparse within the interim reclamation areas. This needs to be monitored during the 2018 growing season. If revegetation is not increasing significantly, then reseeding will be required during the fall 2018 seeding window, no later than Nov. 1, 2018. Cattle exclusion and mulch installation may be needed for successful vegetation establishment.

1002 SITE PREPARATION AND STABILIZATION

1002a. FENCING _____

Comment _____

Corrective Action _____

Date _____

1002b. SOIL REMOVAL AND
SEGREGATION _____

Comment _____

Corrective Action _____

Storm Water:

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment
<p>Comment: Poor revegetation in the interim reclamation areas results in exposed soils and unstable erosional conditions. Stormwater monitoring is needed along with vegetation monitoring during te 2018 growing season. If erosion is occurring, additional stormwater controls will need to be installed. Successful revegetation will help stabilize erosion within the project area.</p> <p>Corrective Action: Date: _____</p> <p>Pits: <input checked="" type="checkbox"/> NO SURFACE INDICATION OF PIT</p>
