Department of Natural Resources

Inspection Photos

Location Name: Rawhide Flats 10-68-16

API: 05-069-06435

Photo 1. Photo taken from the entrance of the location off CR7. Operator shall remove sign.

Photo 2. Photo taken from the entrance of the location off CR7, facing West. Final reclamation activities have not been performed on the access road. Appears gravel was scrapped off to the side of the access road but has not been removed, contoured or seeded. Operator shall perform final reclamation activities throughout the entire access road per Rule 1004. Canada thistle, a List B Colorado noxious weed, was observed at the entrance off CR7 and the well location entrance.

Photo 4. Photo taken from the entrance of the well location, facing North. Photo illustrates a patch of Canada thistle which continues north along the fenceline.

Photo 5. Photo taken from the northeastern location, facing South. Little, to no, germination of desirable species was observed throughout most of the location. Kochia, the green foliage illustrated in the photo, was observed throughout most of the location. Operator shall control and manage the weedy, annual Kochia until location meet Rule 1004 vegetation standards.
