RE: **Surface Owner Consent**  
Statewide Horizontal Offset Policy  
Sec. 15 T4N R63W-Weld County, Colorado

Dear Mr. Cervi:

The well listed below is located within your current property boundary. This well was plugged and abandoned to the standards required by the Colorado Oil and Gas Conservation Commission ("COGCC") at the time. However, Pursuant to the COGCC's Interim Statewide Horizontal Offset Policy, dated February 10, 2014, additional work is required on this well before new horizontal wells within 1,500' can be hydraulically stimulated.

- **UPRR #13-15 (API #05-123-09341):** Drilled November 1977, plugged February 14, 1978

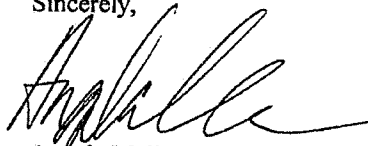

Pursuant to the COGCC Policy, Confluence is required to obtain surface owner consent before accessing the subject well. Our plans for this well are detailed below and you will receive communication at least one week prior to all operations detailed below:

- Accessing the property with heavy equipment to re-enter the well and bring the well abandonment up to today's standards.
- Accessing the property to conduct final reclamation to return the land to its current state.

As mentioned above, the surface owner's consent is required. Should you find these plans acceptable, please sign the space provided below.

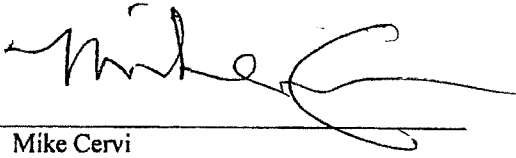

Please contact me at 303-226-9506 or at [amallon@confluencelp.com](mailto:amallon@confluencelp.com) if you have any questions.

Sincerely,

Angela Mallon

By signing below, you consent to allow Confluence DJ LLC the right to access your property to re-enter the UPRR #13-14.
