**Good Housekeeping:**

Type

WEEDS

Comment:

Inspection #682503505 documented noxious weeds (Diffuse Knapweed, Centaurea diffusa) along access roads and the location and required operator to manage and remove.

Operator submitted resolution stating location was sprayed. Evidence of herbicide evident, however spraying does not appear to have been sufficient as many plants appear to be viable and have continued to mature/flower. Additionally, corrective action required removal of the noxious weeds; Diffuse knapweed remains on location. Original corrective action and date remains applicable.

Corrective Action:

Properly remove and control noxious weeds. Ongoing weed management and monitoring is required, and needs to occur in accordance to COGCC rules and regulations. Due to the sensitive timeframe required to manage noxious weeds prior to seedhead maturation, and due to complaints and compliance concerns on adjacent locations, a shortened corrective action date of 6/22/2018 is being provided.
