Description

	<p>As of July 20, 2018, backfill of the excavation was not complete and reclamation of the excavated area had not commenced. COGCC has passed this Form 19 to acknowledge receipt of the attached information by the COGCC and does not imply approval of the closure request. COGCC has removed the closure request from this Form 19. The spill remains unresolved until backfill of the excavation is complete and reclamation of the excavated area has been implemented in accordance with the 1000 series rules.</p> <p>Upon completion of the backfill and implementation of required surface reclamation of the disturbed area, Operator shall submit a Form 19 Supplemental Report to request closure. The Form 19 shall include photodocumentation of the surface reclamation of the disturbed area.</p>

Environmental	Operator submitted additional documentation of excavation and confirmation soil sampling on Form 19 Document #401686435.	07/23/2018
---------------	--	------------

Environmental	<p>Several samples contain SAR or EC over the Table 910-1 Concentration Levels. However, only one of those samples, Sample 3-1, was collected within 3 feet of the surface. The rest of those samples appear to have been collected at depths of three feet or greater.</p> <p>The area around sample 3-1 needs to be further removed or remediated to bring the surface soils to below a SAR level of 12, and then the area needs to be resampled to verify compliance with Table 190-1. The spill cannot be resolved until the remediation is complete.</p>	05/03/2018
