COMMENTS:

Burlington Resources respectfully request an amendment to the above named location's Form 2A. BMP Number 16 is technically infeasible due to electrical classification challenges and solids control issues that will result from enclosing the shakers and cuttings management system.

In lieu of BMP #16 for odor mitigation, Burlington Resources requests the following odor mitigation: "All open top tanks and process equipment containing oil-based mud will be kept more than 1100' away or more from building unit "
