Field Inspector Assigned: Adam Kraich

Complaint Received:

Date: 7/17/2018

Complaint Contacted:

Date: 7/17/2018 @

Location #: 413189

Inspection Document #: 691300402

Nature of complaint: Air Quality

Field Inspector Actions:

On 7/17/2018; I received a complaint in regard to air quality on the RayNelson 33-34 location, owned and operated by Crestone Peak Resources. Accompanying the complaint was a thermal imaging video produced by the complainant, original footage was from 6/27/2018.

On 7/17/2018; I performed a thermal imaging audit from the same location as the complainants video. It's important to note that the complainant's video was shot while a workover rig was performing maintenance operations on the well. The original video appears to show a workover rig behind a 36' sound wall, as well as heat signatures from 2 combustors.

The 7/17/2018 thermal imaging audit reveals only one combustor in operation. Thermal imaging appears to show no fugitive vapors, rather the heat signature off the combustor on location.

No violation of COGCC rules were observed at the time of the inspection.

All information reviewed and site inspection information were submitted to the complaint specialist for further review.
