Hi Rick,

The monitoring report is correct. The wasp nest is definitely located on MP-4, and the field notes indicate that MP-4 was not sampled or gauged. The technician must have used the wrong pre-printed label when sampling. Please let me know if you have any additional questions or need additional documentation.

Thank you,

Drezden

Hi Drezden

On the monitoring report attached to the Form 27 COGCC states that MP4 was not sample due to a wasp nest. However, the lab report includes data for MP4, but no MP2. Which is correct?

Thank you

Rick

### eForm 27 – Site Investigation and Remediation Workplan

COGCC has received for review and processing the Supplemental Site Investigation and Remediation Workplan. Upon review and approval by COGCC Regional Environmental Protection Staff, a Remediation Project Number will be assigned. Until that time, please refer to Document 401712604 and direct all correspondence related to this project to Rick Allison
