COMMENTS:

Produced water volumes in the DJ Basin are increasing due to the commissioning of the DCP Mewbourn plant. NGL is being asked by upstream producers to increase the process of produced water to accommodate the enhanced production volumes.

NGL is requesting the injection volume for the C2B well be increased from 10,000 bpd to 15,000 bpd. The C2 and C2C well are restricted by surface and flowline limitations and unable to injection additional volumes.

NGL will monitor seismic activity in the region to ensure no immediate anomalies are observed.
