VEGETATIVE COVER \_\_\_\_\_

Comment: Previous inspections required the well pad location, and portions of the access road to be recontoured/regraded and revegetated. Previous inspections also required that additional reclamation be conducted within areas of the fenced remediation area that are bare/exposed soil and/or predominantly undesirable weedy plant species. Reclamation at the areas appear to have been conducted. Reclamation in process.

Inspector Name: Trujillo, Aaron

Corrective Action:		Date

**COGCC Comments**

Comment	User	Date
In the previous inspection, it was documented that revegetation activities were conducted in the bare areas of the well. Very little desirable perennial germination observed in these areas. Additional seeding/reclamation may be required in these areas.	trujilloam	08/03/2018
